PROFILE

Frontend-focused Software Engineer with a strong foundation in React and Next.js, building scalable, performance-driven web applications used by 500+ users. Experienced in integrating APIs, optimizing frontend performance, implementing SEO strategies, and leveraging AI/LLM APIs to build intelligent features. Combines an engineering mindset with modern UI development to deliver clean, responsive, and user-centered solutions.

TECHNICAL EXPERTISE

Proficient in modern frontend development using React, Next.js, JavaScript (ES6+), TypeScript, TailwindCSS, and React Native, with backend experience in Node.js, Express, MongoDB, Firebase, and REST API integration.

Experienced with WordPress customization, SEO optimization, server-side rendering, Core Web Vitals improvement, and deployment via Vercel/Netlify.

Familiar with LLM API integration, AI-assisted workflows, authentication systems (JWT/OAuth), and cloud-based storage solutions.

EXPERIENCE

Frontend Development Intern

TechHub Solutions, Lagos | Jan–Jun 2025

- Built reusable UI components for SaaS platform serving 10,000+ daily users
- Integrated REST APIs and optimized rendering performance
- Reduced page load times by 30% through code-splitting and lazy loading
- Worked in Agile environment using Git and JIRA

Hamzatronics Technologies, Ogun | Mar – Jun 2024

- Gained hands-on experience with Arduino-based microcontroller systems and embedded hardware fundamentals.
 - Assisted in configuring and testing controller modules for power and automation applications.
 - Performed sensor integration, circuit debugging, and controller calibration tasks.
 - Applied embedded systems knowledge to the controller design of my Solar-Powered Laptop Power Bank project.
-

Solar-Powered Laptop Power Bank

Final Year Project | Jan – Aug 2024

- Designed and built a portable solar charging system with custom MPPT control, achieving 85% efficiency.
- Reduced laptop charging time by 40% through optimized power management design.
- Delivered 6–8 hours of output power from 4 hours of solar exposure.
- Published project results in a peer-reviewed engineering journal.

DocuConvert – Full-Stack Web Application (2025)

- Built a scalable document conversion platform serving 500+ students and processing 2,000+ monthly conversions.
- Implemented secure authentication, cloud storage, and optimized backend workflows for reliability.

Freelance Web Projects (2023–Present)

- Developed 5+ responsive client websites using React, Next.js, and WordPress.
- Built an appointment booking system handling 20+ monthly bookings.
- Improved website visibility and performance through SEO optimization and speed tuning.

AI-Integrated Web Tools (2026)

- Built lightweight web tools integrating LLM APIs to automate content and productivity workflows.
- Designed structured prompts to improve AI response accuracy and usability.

EDUCATION

B.Eng. Electrical and Electronics Engineering
Federal University of Agriculture, Abeokuta
GPA: 4.14/5.0 (Top 10%)
